SmartAgents

Update

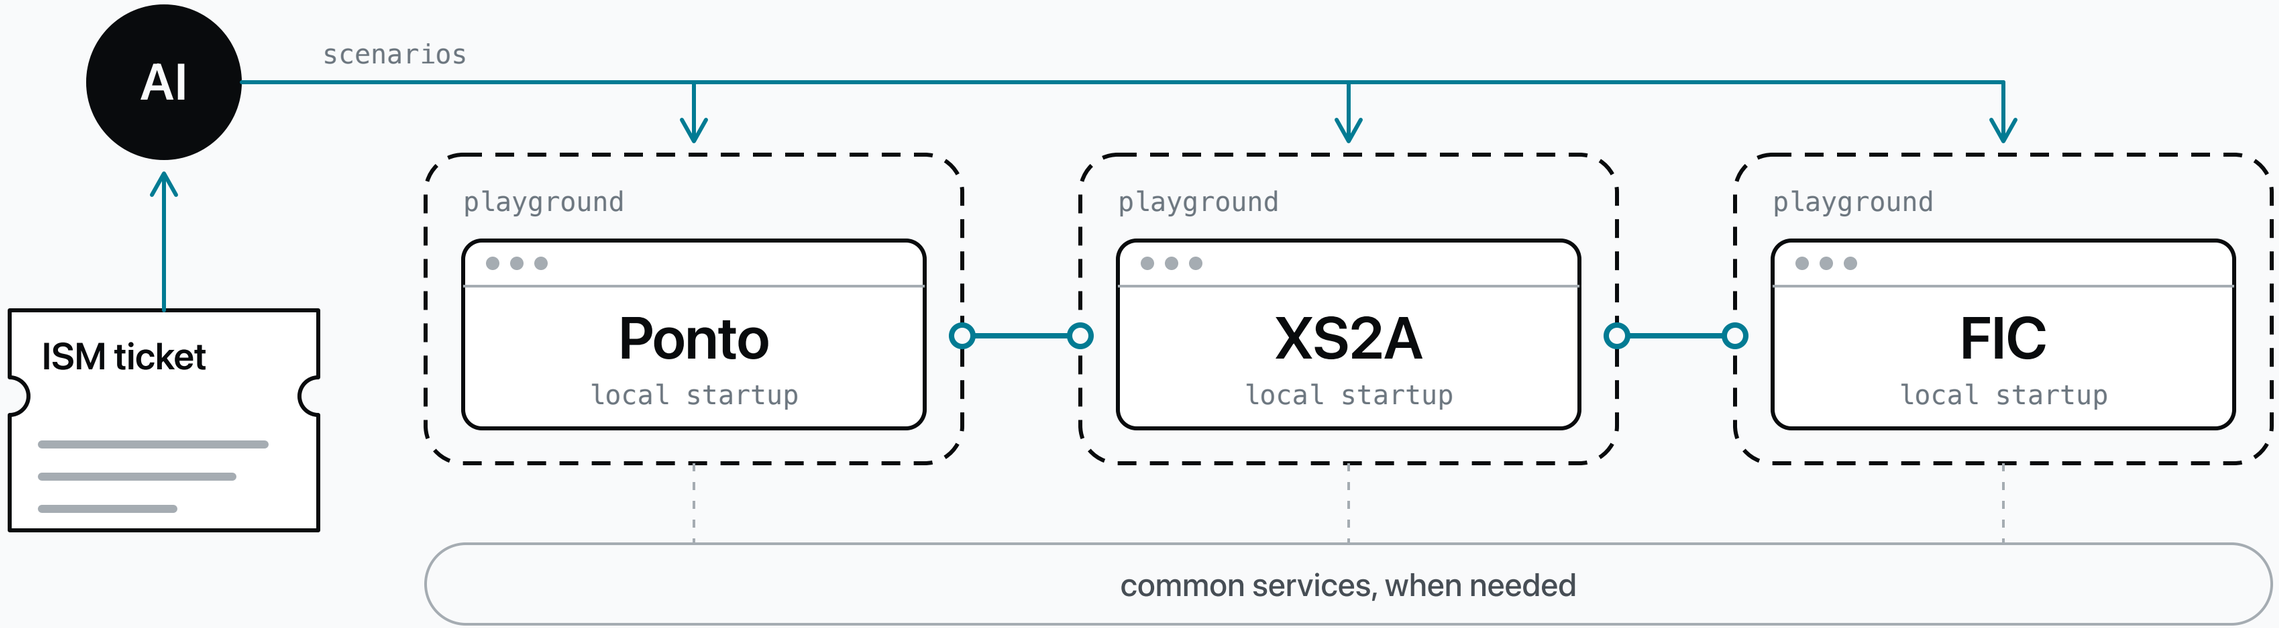

SmartAgents · Isabel · 20 October 2026

This week

AI-native SDLC	A short pause on bringing people together. We are fleshing out the material first, so the meetings after it move faster.
ISM tickets	Setting up a system to handle them, built on local playgrounds.
Autonomous agents	Setting up a node for them. Waiting on the ISD from Bastiaan Ceuppens.

Playgrounds for ISM tickets

Each playground is a local startup of one application. It runs on its own or joined to the others, so the AI can replay what a ticket describes.
