Ponto update

Coaching session	Well received. A second one is planned with the team next week.
CI setup for testing	Shown to operations today, to get their view on the setup.
Local environment for ISM tickets	We are getting the environment ready to pick up ISM tickets locally.
In sync with the PwC work	We are bringing our existing work up to date with the PwC delivery.

Honourable mention

The team delivered PwC, mainly using AI.

They keep finding new ways to work with AI, and they are using it more.

General update

First autonomous agent	A proof of concept of the review agent is built and working locally.
AI-native SDLC	The first talks are under way. They are taking a little while.
