SmartAgents

Update

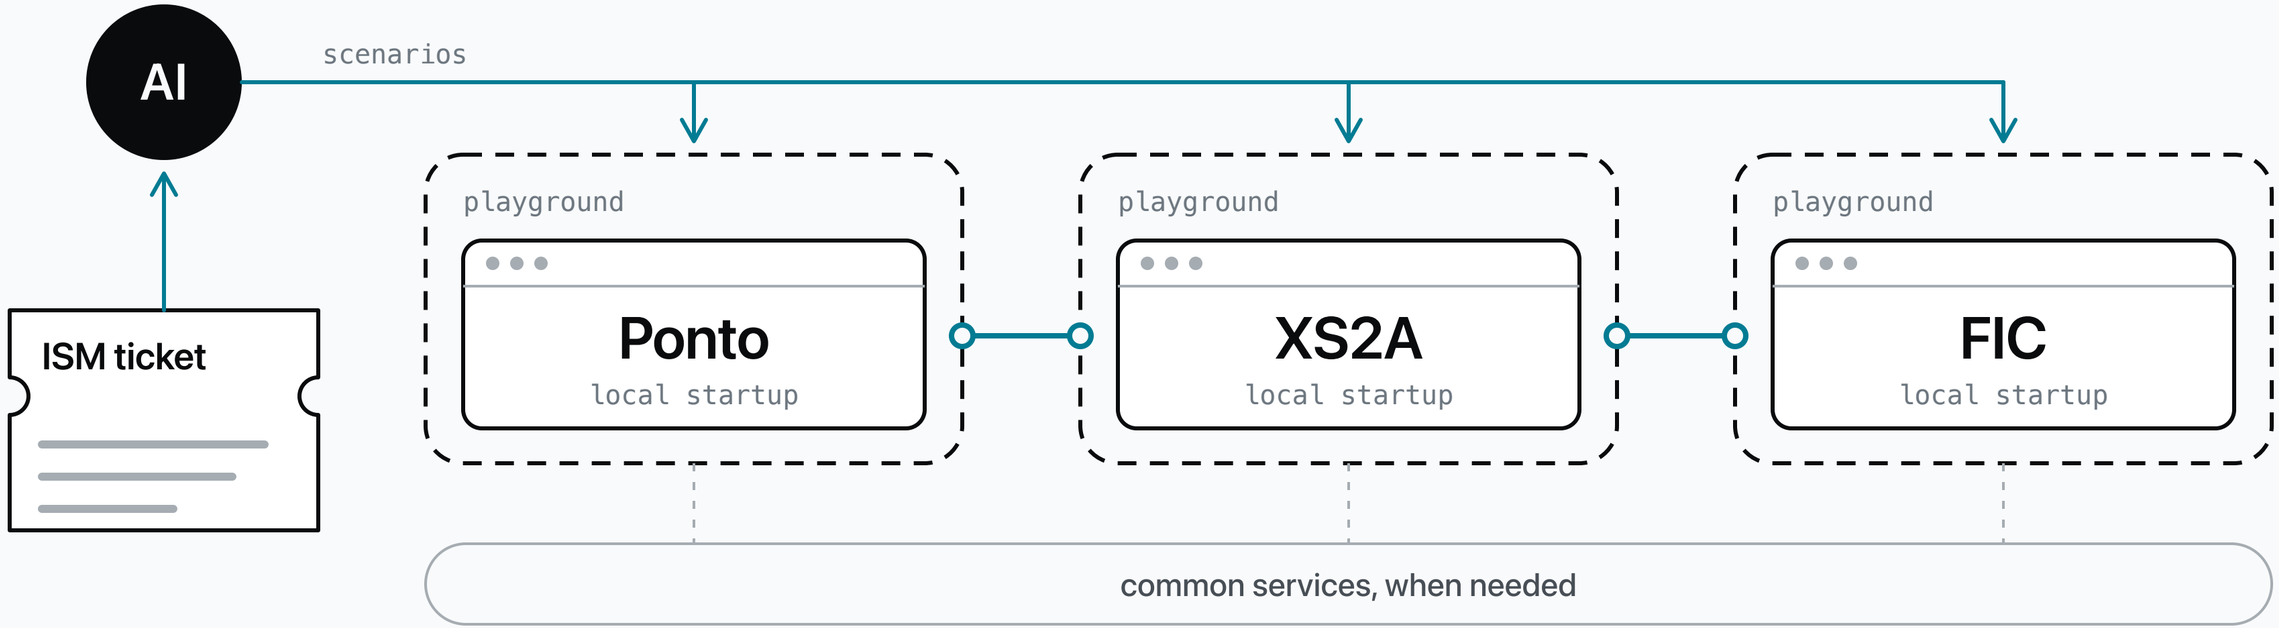

SmartAgents · Isabel · 20 October 2026

This week

AI-native SDLC	Drafts are ready to speed up the next meetings. The meetings restart now.
ISM tickets	Setting up a system to handle them, built on local playgrounds.
Autonomous agents	Made more expandable. Waiting on the VM from Bastiaan Ceuppens.

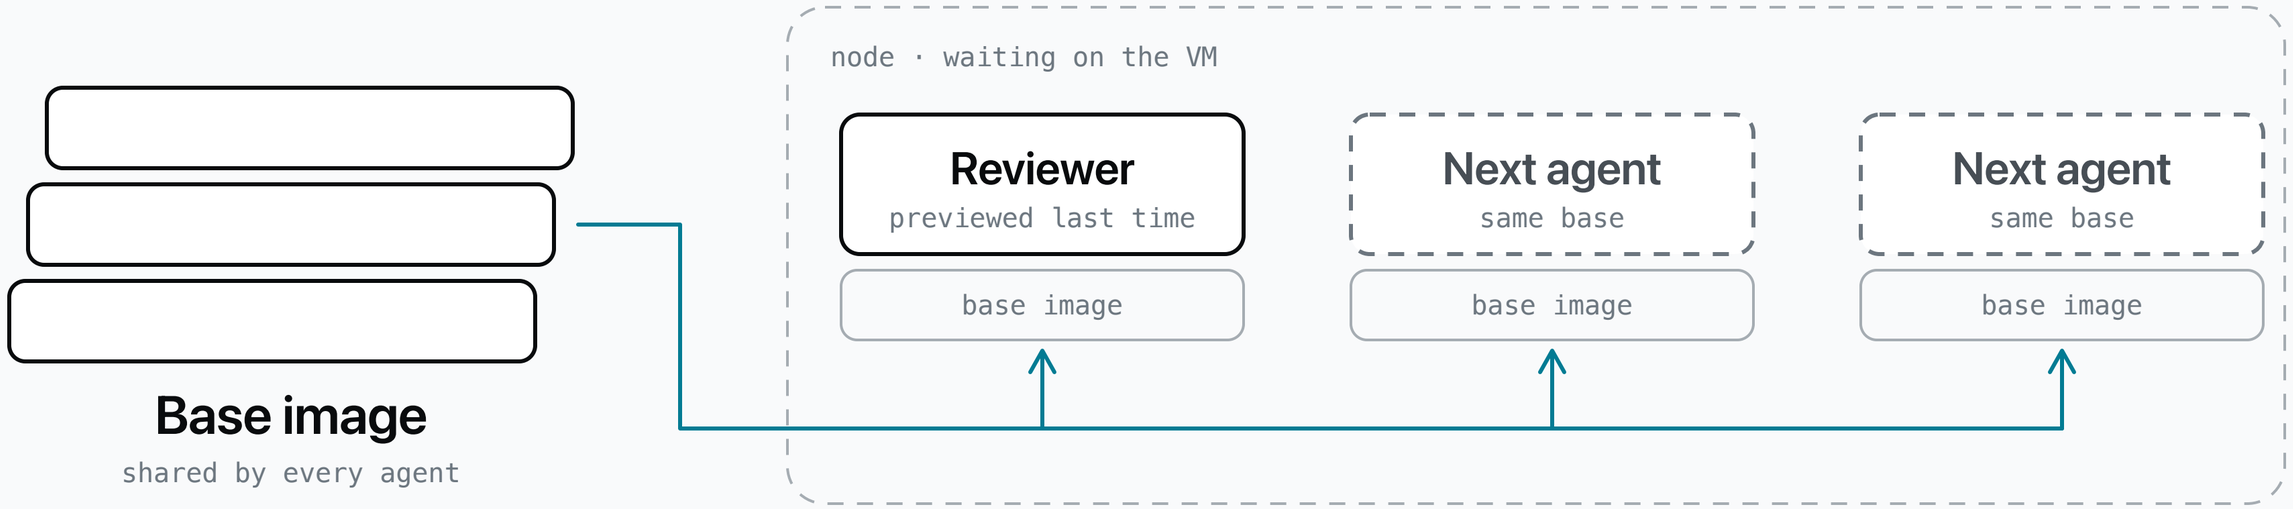

Playgrounds for ISM tickets

Each playground is a local startup of one application. It runs on its own or joined to the others, so the AI can replay what a ticket describes.

One base image for every agent

The reviewer is the first agent built on it. Every next agent starts from the same image.
